Wendover Air Force Base ,
Magazine Building (also Oil
and Grease Storage)
(Building No. 430)
HABS No. UT-125-K
Page 1

Built in 1943, this building was originally located just off the northeast corner of the Control Tower (#429). It has been moved, however, about 150 yards north of building 412, a hangar. This structure is accessible from A Street.

Built by the Army at a cost of \$250, the building measures 22 feet-2 inches by 16-feet-1 inch. It now sits on a concrete foundation, although apparently had no foundation originally. The floor is wood frame while the walls are wood frame sheathed with asbestos shingles. The shed roof is covered with rolled tarpaper. This "Mobilization," "Temporary" type structure has been outgranted to the U.S. Weather Bureau and is now used for the storage of helium.
